The Yale School of Medicine invites applications for a full-time faculty position at the rank of Assistant or Associate Professor. We welcome scholars from a variety of disciplinary backgrounds including, but not limited to: clinical epidemiology, clinical trials, comparative effectiveness, implementation science, pharmacoepidemiology, operations research, or health economics.

An MD or other doctoral degree (e.g., PhD, Dr PH, ScD, DBA), by the start of appointment, and post-doctoral research experience is required, as well as evidence of potential for a scholarly career that will include publications and successful grant writing. For physicians, Board Certification or Eligibility in Addiction Medicine is encouraged.

The successful candidates will be part of the Yale Program in Addiction Medicine situated in the Department of Internal Medicine's Section of General Internal Medicine. Important content areas closely aligned with a focus on common forms of substance use and addiction include prevention, treatment, controlled substance prescribing, pain, overdose, HIV, and Hepatitis C.

The successful candidates will be expected to work collaboratively across various departments in the School of Medicine and graduate schools at Yale and have or develop an externally funded research program leading to top tier peer-reviewed publications.

Review of applications will commence immediately and continue until the positions are filled. Applicants are asked to prepare a letter of interest which includes a research statement, three references, a curriculum vitae and copies of recent publications, and to apply online at:
